WORK EXPERIENCE

Sun Fibo Technology Sep 2025 – Mar 2026
Software Development Intern – C# Domain/CAD Automation

- Engineered backend application logic and automation tools using C# and Object-Oriented Programming (OOP) design patterns.
- Developed custom AutoCAD plugins and automation scripts to optimize engineering project workflows.
- Collaborated with senior developers to design database schemas, write optimized SQL queries, and execute data processing routines.
- Applied core object-oriented principles to refactor existing codebase, improving code maintainability and execution speed.

KEY PROJECTS

Hospital Appointment Scheduling System
Java — Oracle DB — JDBC — HTML/CSS

- Developed a full-stack web application for doctor appointment booking, patient record tracking, and schedule synchronization.
- Implemented backend relational database interactions using Java and JDBC to execute queries, stored procedures, and data management workflows.
- Co-authored and presented a research paper titled "Electronic Doctor Appointment Scheduling and Management System" at IGBTSD 2025.

Organ Donation Mobile & Web Application
Java — MySQL — Relational Logic

- Built a secure platform connecting donors, recipients, and hospitals with structured backend data routing and validation.
- Designed normalized database schemas to enforce strict data integrity and enable fast record retrieval.
